Partners In Evolution

Volume 1, Issue 10, 5-24-12

The ASCP Conference

Thank you to all of the participants that attended our first ever annual conference for The ASCP. Without you, this would not be possible. For those that couldn't make it, don't worry it is annual. That means you have another chance to attend next year, where it will be held in Indianapolis. Keep checking our website for updates as information becomes available.

MOU for YOUR Academy

An email was sent out this past Friday with an MOU attached to it. Please send this paper back SIGNED as soon as possible. This document is an understanding that you would like us, The ASCP, to be your designated ASC and provide support and training for all of your needs. You can send that back by email, fax, or land mail. Details can be found at our website http://theascp.org or on the email that was sent out.

Networking Academy Technology Update

Over the past year, as part of Academy Evolution, the Cisco NetworkingAcademy has introduced business process improvements to our academy community: new service models, academy agreements, and freedom of choice.

We are now preparing to roll out the second phase of Academy Evolution that you have all been waiting for—our technology evolution! So what are some of the driving forces behind this evolution?

Cloud computing, the proliferation of rich-media content, and the rapid rise in the use of mobile devices and applications are all changing the market landscape—and these technology advances have enabled new models for teaching and learning:

- Learning methodologies and practice have been influenced by Web 2.0 collaborative technologies and the emergence of social media and its use for social and informal learning.
- The rapid increase in mobile devices worldwide, and their potential for learning, provides new opportunities for education.
- New, innovative learning management systems have made a big shift and have evolved to support formal, informal, and social learning components.

Are You Ready to Learn More about the Technology Evolution Improvements?
Please register to attend the free virtual Academy Conference event on June 18, 2012—you won't want to miss it! Additional information will also be posted as it becomes available in the *Club NetAcad* area of the Instructor Communities.

Please don't hesitate to contact us with your concerns and questions.
