

Countdown Evolution

Change is Coming

Volume 1, Issue 5, 1-20-12

February 22nd, the date when all academies in Indiana and Illinois will be migrating to the new Academy Evolution tree is just around the corner. This means that your immediate parent will be [The Academy Support Center Partnership](#), a partnership between Ball State University and Moraine Valley Community College.

Your old parents, either of the regional academies or BSU CATC or MVCC CATC, will no longer provide you with support. This change applies to all sites in Indiana and Illinois that currently teach any Cisco Networking Academy curricula.

Don't Forget...

Documents and past Webinars on Academy Evolution can be found on the Club Netacad website.

We are anxiously anticipating the good things to come with these changes. They will better prepare us for the future and the effects will be felt by us all. [The Academy Support Center Partnership](#) will provide you with access to over 10 college level faculty with full knowledge in networking and a long history with the Academy Program. [The Academy Support Center Partnership](#) is here for your needs each step of the way and will assist you with providing the following:

- Increased quality of programming
- Professional development
- Plans for student growth
- Recognition of your program
- SUCCESS!

We will be continuing to inform and educate you through these newsletters and contacting all of you very soon with more information on this changing process and information to help you with the transition.
